

I'm passionate about building intelligent, scalable software products and working across complex system architectures. I focus on performance, reliability, and integrating modern technologies to create future-ready solutions. With a deep understanding of business and customer needs, I strive to transform challenges into simple, meaningful digital experiences.

SKILLS

Technical Skills	Java, JavaScript, TypeScript, React, Spring Boot, Express, Next JS, Postgresql, MySql, MongoDB, Spring Boot, Lua
Tools	Git, GitHub, Docker, Docker Compose, tmux, Neovim, Prisma, Drizzle, Postman, Swagger, Terraform, Bash, Open AI, Langchain, Langgraph
DevOps and Cloud	AWS (EC2, S3, RDS, Lambda, SNS, SQS, CloudFront), Jenkins, GitHub Actions, Kafka, Redis, Kubernetes (k8s), NGINX, CloudWatch, Prometheus, Grafana, CI/CD Pipelines, Reverse Proxy & SSL
Soft Skills	Leadership, Communication, Time Management and Presentation Skills

TECHNICAL EXPERIENCE

Junior Fullstack Developer	OCT 2025 — MAR 2026
Prismex Technologies PVT LTD	Hyderabad, India

- Designed and developed backend services using Java and Spring Boot, exposing REST APIs for scalable applications.
- Architected and built Voisely.ai end-to-end using React.js and backend APIs, defining system design and scalable architecture.
- Designed and developed backend services and REST APIs, improving performance, stability, and security.
- Reduced overall response times by 80% through query optimization, caching, and backend improvements.
- Achieved <40 ms API latency and optimized database queries to single-digit milliseconds.
- Deployed and managed applications on AWS EC2, improving reliability by transitioning from serverless to serverful architecture.

Software Development Engineer Intern	JUNE 2025 — AUG 2025
Edurup School of Business	Remote, India

- Built scalable backend architecture for LMS with REST APIs and modular service design.
- Developed frontend components using React.js, improving user experience and responsiveness.
- Implemented caching strategies and backend optimizations to reduce response times.
- Improved SEO and performance of landing pages, increasing visibility and load efficiency.

Front-End Developer Intern	JUNE 2024 — JAN 2025
Imminity PVT LTD	Remote, India

- Improved and productionized the ParentG app, enhancing features, fixing issues, and delivering a stable live release.
- Built frontend modules for an internal e-commerce platform, improving usability and workflows.
- Developed complex internal dashboards for analytics and operational use cases.
- Gained hands-on experience delivering production-scale frontend solutions and collaborating with cross-functional teams.

PROJECTS

Drag — Visual Workflow & Infrastructure Automation Platform
Designed a workflow system where each drag-and-drop node publishes a job to RabbitMQ, triggering backend automation tasks.
Built an AI agent that generates Terraform, Ansible, or CloudFormation configs based on workflow requirements.
Enabled one-click infra deployment with real-time execution logs and integrations for Grafana and internal log monitoring.
Implemented vector-based workflow search using Elasticsearch for fast retrieval of global workflows and automation patterns.
Delivered a modular, extensible architecture for scalable infra orchestration.

EDUCATION

Bachelor of Technology in Computer Science and Technology, ITM Skills University	2023 - 2027
Class 12, Himaja Junior College, Puttur	2021 - 2023

ACTIVITIES AND HOBBIES

Exploring distributed systems, cloud architecture, and modern DevOps tooling
Building side projects and experimenting with AI agents and automation
Customizing my development workflows with tmux, Neovim, Linux, Hyprland, and advanced terminal tools
Exploring startups, tech innovation, and new product ideas
Diving into deep-tech domains like quantum computing and emerging compute technologies
